### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Ogiso (US Patent 6640756). See col. 4, lines 59+. This reference teaches that in certain situations only one of the intake and/or exhaust valves is activated in some of the cylinders, while at the same time in other cylinders all the valves operate normally.

3. Claims 1-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Clarke et al (US Patent 5117790). See Fig. 4 and Fig. 6. This reference teaches that in certain situations different cylinders or groups of cylinders are operating in different modes. As a result of the different operating modes, different valve groups and valves in different regions of the cylinders are activated in different cylinders. See Fig. 6, steps 604,606 and Fig. 4, high load, low load, charge heating and exhaust breathing modes and col. 3, lines 35-68.

3. Claims 1-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Matsumoto et al (EP 1 054 148). This reference teaches operating in modes wherein some of the cylinders are activated and others are de-activated. During deactivation some of the valves are maintained closed.
